DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15, drawn to a storage system comprising operation coordinating logic, classified in class 710, subclass 6.

II. Claims 16-30, drawn to a method for enhancing data transfer, classified in class 710, subclass 33.

2. The inventions are distinct, each from the other because of the following reason:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as use in any data transfer environment. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
